Creating the Future SATAKE

Full-Color RGB, NIR and Shape Sorting

NRM Series

The Utimate Solution in Optical Sorting

NIRAMI, Satake's brand new full color optical sorter has arrived. Offering the ultimate solution in optical sorting, NIRAMI is sure to fulfill your sorting needs. A distinctive posture seen in the classical Japanese drama of Kabuki, NIRAMI means "to look intensely".

Full Color Cameras

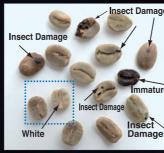

The machine is equipped with Japan's latest full color cameras which allow the sorter to match the eye's ability to see true color. Even the smallest color

differences are identified and rejected.

Coffee B

F

Near Infrared (NIR) Camera

The NIR camera detects inorganic foreign material such as stones, plastic, glass and other items that have a similar color to the accept product. Impurities such as glass, plastic and stones which have the same color as the accept material cannot always be detected by a full color camera. Featuring both NIR high technology camera and RGB full color cameras the NIRAMI has the ability to detect and remove foreign materials.

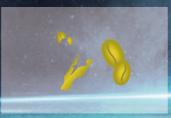

Shape Recognition

Shape recognition technology enables the machine to sort the material by shape (such as broken or adhered) which conventional color sorters could not achieve.

*Sorting performance varies depending on variety, size and contamination of material.

Accepts

Rejects

Advanced 3S Software

The 12 inch touch screen is designed for easy use.

The user-friendly interface with simple icons and images provides intuitive operation of the machine. The advanced software evaluates the product application and automatically

Remote Panel Control

creates the sensitivity for accurate defect

removal.

Optional remote access via secure internet connection allowing the flexibility to monitor performance and provide diagnostic support.

optional service

Easy Clean

The open type body enables easy access to the cleaning positions.

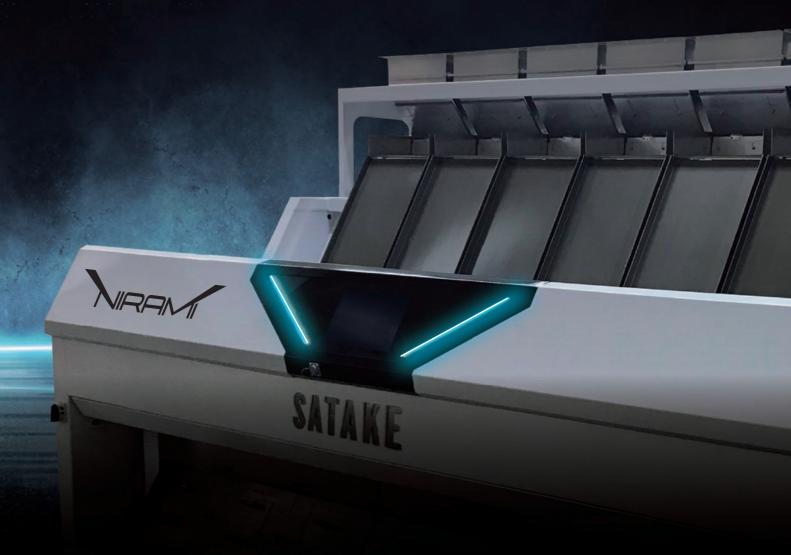

Sort Various Materials

The machine serves the latest requirements for sorting rice, lentils, beans, cereals and nuts etc.

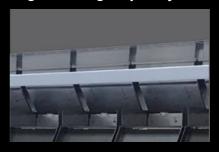

Corn Seed

High Sorting Capacity

3 to 7 extra-wide chutes (sorting modules) to suit all capacity requirements.

LED Operation Indicator

An LED operation indicator on the front of the NIRAMI allows operators to see the machine status at a glance.

Tertiary Sorting

Precise sorting is achieved with a three stage sorting system. Rejects from the primary sort can be resorted twice, within one unit, to maximise the reject concentration.
